

Name: \_\_\_\_\_ Date: \_\_\_\_\_

**DIRECTIONS** Imagine you are attending school 25 years ago, before schools or most families had computers.

Open a new document. List three advantages to using computers.

1. Think about things like typing assignments versus hand-writing them, being able to save and organize stuff for your classes, and using computers to do research. Give the document this **title: '3 Reasons to go digital-[your name]**, and save it according to the manner your school has taught you.
2. Once you have finished step 1, come up with some specific ideas about how computers and technology might be a part of the classroom in the future. What sorts of equipment do you imagine that high school students will use on a regular basis to complete their work in the future? Write a paragraph describing how students in 25 years will complete their assignments using technology. Add this to your **3 Reasons to go digital** file, and re-save it to *My Workspace* on *Sakai* with this title: **Reasons to go digital today and tomorrow [your name]**.
3. Finally, use the Assignments Tool in *Sakai* to submit your two files for evaluation: **3 Reasons to go digital-[your name]** and **Reasons to go digital today and tomorrow [your name]**.
