Learning About Your Internship Through Research

Goals

- Find **three** books on your topic that are interesting to you. Provide the appropriate bibliographic information on each book and a one-paragraph summary of the book. When this work is finished, **pick one** of the three books to bring to your internship teacher to check out of the library.
- Find **one** article from a newspaper, magazine or journal on your topic that is interesting to you. Provide the appropriate bibliographic information on the article and a one-paragraph summary of the article.
- Find **one** item from the audiovisual section of the library on your topic that interests you. Provide the appropriate bibliographic information on the item and a sentence or two summarizing what the item is about.
- Find **one** web site on your topic that interests you. Provide the appropriate bibliographic information for the site and write a sentence or two summarizing what the site is about.
- Record the bibliographic information and summaries on the *Research Reference Information Form*.

Step One Review this assignment at school with your internship group. Listen carefully to teacher's directions on the trip to the library.

Step Two Pick a focus area to research while at the library. The topic must relate to the mission statement of your internship site in some way.

Step Three Once you have found a book, look at the back cover, the table of contents, and the introduction to figure out what the item is about. Ask someone at the information desk if you are having trouble locating any of these items.

Step Four Fill out the reference information for your resource (book, article, audiovisual) and write the summary. Do this for each resource (Total of 6).

Step Five Be prepared to discuss your resources with your team. In addition, have one resource selected that you will present to the class.

Possible Subject Areas: Fill in from class discussion.

If you type any one of these words as a basic SUBJECT search at the library many more options and related subjects will appear.
