

Name: _____ Date: _____

Below are the steps of the Action Project. Remember that this project takes place over many weeks, so take your time, plan carefully, manage your time wisely, and do something you are passionate about.

1. Brainstorm ideas with your class and post your ideas on a *Sakai* Forum. Visit the Forum a few times to respond to your classmates' ideas and post new inspirations after you see their ideas.
2. Join two or three other classmates and decide as a group which project you want to take on.
3. Work with your team to develop a proposal for your Action Plan. This proposal will include a step-by-step plan for you to enact.
4. Delegate the tasks of your plan among your group members. Make sure everyone has equal work in the project.
5. Keep a journal of your progress on *Sakai's* Blogger. Later lessons will guide you through the completion of the project. Plan on writing a short summary of what you accomplish each time you work on the project and reflect on your progress.
6. Present your Action Project as a group when it is completed.
